## What is Super Phone ?

### What is Super Phone ?

Super Phone is an Internet telephone device, that provides a USA Phone Number anywhere in the world, using the Internet, no need for computers, over a dialup internet connection in the destination country.

### How Does it work ?

Super Phone works using Internet. It connects itself to Internet using a Phone Line with built in modem or via DSL /cable/wireless/ Internet service via its built in Ethernet Card.

### Via Gateway:

Once connected to Internet, the party in the United States, Canada or any other country, can dial our Access Numbers that connect them to the Super Phone (physically located overseas) over Internet. For USA callers, this is a domestic call to an international long distance number.

### Via Device to Device:

You Can call between any 2 Super Phone for free, over the internet, no computers

## Cost

### What does it cost ?

Super Phone, buy and own it for a special price of \$179 with \$10 me every month for FREE, with no Contract. If you rent the phone, there is a \$55 one time activation charge, \$55 disconnection charge at the time of disconnection of the service. A major Credit Card is required to rent the Super Phone. If you are outside the United States or have an insufficient credit rating, there will be a \$99 refundable Security Deposit.
